Part I Translation (30 minutes, 20 points, 10 for each section)**参考译文：**

斯蒂芬·霍金表示，在第3个千年结束之前，人类将很有可能由于两种病毒而不是一场核战争灭绝。这位《时间简史》的作者决定重写这本书，缩减文字并增加插图说明，对于人类未来面临的威胁，将突出生物学方面的影响，而不是核物理方面的因素。

斯蒂芬·霍金断言，比起核武器来，遗传工程在一个小小的实验室里所能制造的麻烦要多得多。这位剑桥大学的教授称：“如果人类不能移居其他星球，我认为很难活过第3个千年。”

就这一挑战而言，他相信人类将能够创造出一种特殊的空间驱动系统，使宇宙飞船的飞行速度达到或超过光速，这样就可以在75亿年后，太阳爆炸之前摆脱太阳系的束缚。

参考作文：

As is seen, mobile-phone has become more and more popular in China. It is reported that over 200 million people are using mobile-phones in hands. With them millions and even billions of messages are sent and received among their users, which is indeed the biggest miracle in the history of human communications. As a result, there has been formulated a new culture, the so-called mobile-phone culture.

Prosperous as the mobile-phone market is, there exists a lot of problems with the quality of such devices. Among the 26 brands of moving phones used among the Chinese users, six of them, Motorola, Nokia, Ericsson, Samsung, Siemens and Philips, account for about 80 %. Even for the above famous brands, complaints come in millions every day. What is more important, we haven't yet prepared our own brand-products.

Therefore, my first suggestion is to make efforts to bring about our own brand products. The second suggestion of mine is to extend the functions of them. The third one is to educate people, especially, the youngsters, to use moving phones properly, in right time and right place.
